RTU Solution

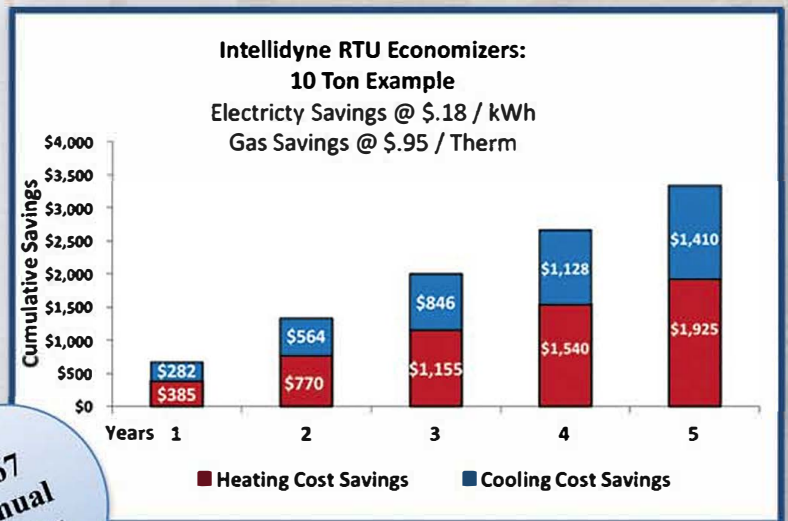

Dynamic Energy Management System for Roof Top Units

The RTU Solution is Intellidyne's solution for Packaged Heating and Air-Conditioning systems. The RTU system package includes the Intellidyne Forced-Air (FA) and Commercial Air-Conditioning (CAC) Energy Economizers: the perfect combination to reduce electricity and gas consumption.

Both controls are easy to install and are backed by a 10% savings guarantee.

IntelliCon-FA

Forced-Air Heating System Fuel Economizer

IntelliCon-CAC

Commercial Air Conditioning Electricity Consumption Economizer

Features

- Dynamic Cycle Management (DCM)® technology is guaranteed to reduce fuel and electricity consumption - typically 10% - 20% or more.
- Saves energy without replacing or upgrading costly system components and without violating manufacturers' warranties.
- Illuminated LCD display shows consumption savings, operating modes, system diagnostics and operating temperatures.
- Compatible on systems with undersized ducting.
- Compatible with packaged or split systems.
- Energy saving system is field-tested and validated.
- Works with any thermostat including setback and multi-zone.
- Reduces maintenance and extends service life.
- Simple installation by qualified installer.
- Saves energy without sacrificing comfort.
- Maximum efficiency year round.
- Fail-safe operation requires no annual maintenance or follow-up visits.
- UL listed, "Energy Management Equipment".
- Short payback period of 10 to 18 months.
- 15-year limited manufacturer's warranty for breakdown or defects.
